

Silvia Hervás Raluy

PHD IN BIOMEDICAL ENGINEERING

✉ silviahervasraluy@gmail.com | 🏠 shervas.github.io/ | 📄 silviahervasraluy | 🎓 Silvia Hervás Raluy

Summary

As a researcher at the Technical University of Munich, I am interested in the study of the biomechanics of cancer. My work focuses on the development of computational models that allow us to explore beyond what is seen in the lab or in the human body. To do this, I love to work closely with clinicians and researchers to learn more and more about the processes that trigger and promote the progression of cancer. I enjoy research, answering unsolved questions and finding new challenges.

Education

University of Zaragoza

PHD BIOMEDICAL ENGINEERING

Zaragoza, Spain

17/10/2018 - 30/10/2023

- Thesis: Insights into tumour growth and metastasis: a computational modelling approach
- Advisors: Prof. Dr.-Ing. José Manuel García Aznar and Prof. Dr.-Ing. María José Gómez Benito
- Grade: summa cum laude

University of Zaragoza

MSC IN BIOMEDICAL ENGINEERING

Zaragoza, Spain

1/09/2017 - 11/07/2018

- Thesis: Mechanics and modeling of actin polymerization: the effects on cell motility

University of Zaragoza

BSC IN MECHANICAL ENGINEERING

Zaragoza, Spain

1/09/2013 - 10/07/2017

- Thesis: 3D finite element analysis of migration under conditions of mechanical confinement

Experience

Alexander von Humboldt Postdoctoral Researcher

INSTITUTE FOR COMPUTATIONAL MECHANICS

Technical University of Munich,
Germany

01/03/2025 - Today

- Supervised by Prof. Wolfgang A. Wall

Postdoctoral researcher

MULTISCALE IN MECHANICAL AND BIOMEDICAL ENGINEERING

University of Zaragoza, Spain

09/01/2024 - 28/02/2025

- Study of the angiogenesis development during an in vivo tumour growth experiment.
- Collaboration with the Navarra Research Clinical Center (CIMA)
- Unravel the process of cell metabolism in tumour formation.
- Bayesian calibration of a discrete cell model.
- Management of an HPC cluster.

Research Associate

MULTISCALE IN MECHANICAL AND BIOMEDICAL ENGINEERING

University of Zaragoza, Spain

26/11/2018 - 30/11/2023

- Creating a patient-specific tumour growth model that predicts both the prognosis and the effects of the different cancer therapies.
- Intense collaboration with medical partners and coordination of the multiscale model development of the work package.

Visiting Researcher

INSTITUTE FOR COMPUTATIONAL MECHANICS

Technical University of Munich,
Germany

15/09/2021 - 31/03/2022

- Development of a multiphysics phase field model based on porous media to unravel the growth of tumour spheroids.
- Analysis of the model parameters using a global sensitivity approach.
- Application of novel Bayesian techniques to calibrate the model parameters.

Research Assistant

MULTISCALE IN MECHANICAL AND BIOMEDICAL ENGINEERING

- Developing of a numerical method for the calculation of cellular traction forces in 3D through an inverse problem.

University of Zaragoza, Spain

23/10/2017 -31/05/2018

Undergraduate Research Assistant

MULTISCALE IN MECHANICAL AND BIOMEDICAL ENGINEERING

- Developing computational models to simulate the confined cell migration mode.
- Designing microfluids devices in CAD and analysing their behaviour on Abaqus CFD.

University of Zaragoza, Spain

26/09/2016 - 14/11/2016

Publications

Summary and metrics

- 11 publications in peer-reviewed international journals
- h index (Google Scholar): 8
- Number of total citations (Google Scholar): >250

Papers in Scientific Journals

Hervas-Raluy S., Sainz-DeMena, D., Gomez-Benito M. J., Garcia-Aznar J. M. Image-based biomarkers for engineering neuroblastoma patient-specific computational models. *Engineering with Computers* (2024): 1-17

Hervas-Raluy S., Gomez-Benito M. J., Condor M., Garcia-Aznar J. M. 25th Congress of the European Society of Biomechanics (ESB). Finite element model of actin polymerization during confined cell migration. July 7-10, 2019, Vienna (Austria)

Participation in Conference Committees

Meeting of the Spanish ESB National Chapter

24-25/10/2022

Responsible for the web-based conference management software system (EasyChair), abstract submission and review procedures, conference poster design, build of the conference proceedings, IT support in the conference rooms.

Zaragoza, Spain

5th International Conference Virtual Physiological Human (VPH)

05-07/09/2018

Participants reception, IT support in the conference rooms.

Zaragoza, Spain

Awards, Fellowships, & Grants

01/03/2025	Humboldt Research Fellowship , Alexander von Humboldt Foundation	€68240
01/01/2025	Seal of Excellence (90.2/100) , Postdoctoral Fellowships - Marie Skłodowska-Curie Actions	-
01/01/2025	Declined: Postdoctoral Fellowship , Fundacion Alfonso Martin Escudero	€68000
02/07/2024	Best Doctoral Thesis Runner-up , European Society of Biomechanics	€250
22/06/2022	Best Biomedical contribution Young Researchers Conference , Institute of Research of Aragon	-
15/09/2021 - 31/03/2022	Research Stay Grant , Fundacion Ibercaja CAI	€3200
15/01/2022 - 31/03/2022	Research Stay Grant , Erasmus +	€887
15/09/2021 - 14/12/2021	Short-Term Grant , German Academic Exchange Service (DAAD)	€4025
1/12/2019 - 30/11/2023	Research Fellowship , Government of Aragon	€84000
Jun. 2017	Best Mechanical Engineering BCs Thesis , Aragon Mechanical Engineers Society	€300

Teaching Experience

Spring 2020, 2021, 2022	Prostheses and implants design , Teaching Assistant
Spring 2021, 2022	Cell mechanics and mechanobiology , Teaching Assistant
Fall 2020	Continuum Mechanics , Teaching Assistant
Spring 2020	Musculoskeletal tissue modelling , Teaching Assistant
Spring 2020	Strength of Materials , Teaching Assistant
2020-2024	Supervision of MCs and BCs theses ,

Participation in research projects

TUMATRIXMODELING: Predictive modeling and simulation of patient-derived tumor organoids: unraveling the role of matrix stiffness and glucose metabolism on tumor growth

MCIN/AEI/FEDER, UE

PI: DR. JOSE MANUEL GARCIA AZNAR

11/2023-Today

- This project explores the relationship between the composition and mechanical properties of the tumour extracellular matrix and the glucose metabolic activity of the tumours, which in turn relates to their growth and resistance to therapies.

PRIMAGE: PRedictive In-silico Multiscale Analytics to support cancer personalized diaGnosis and prognosis, Empowered by imaging biomarkers

Horizon2020

PI: DR. LUIS MARTI BONMATI

01/03/2019 - 01/09/2023

- This project proposes an open cloud-based platform to support decision making in the clinical management of two paediatric cancers, Neuroblastoma (NB) and the Diffuse Intrinsic Pontine Glioma (DIPG).

IMAGO: Image Analysis Online Services for in-vitro experiments

ERC-2016-PoC

PI: PROF. JOSÉ MANUEL GARCÍA AZNAR

23/10/2018 - 29/02/2019

- IMAGO presents the development of a tool for image analysis focused on, but not limited to, the quantification of cell behavior under different conditions. Indeed, IMAGO goes further by providing, when applicable, an image-based finite element analysis (FEA).

INSILICO-CELL: Predictive modelling and simulation in mechano-chemo-biology: a computer multi-approach

ERC-2012-StG

PI: PROF. JOSÉ MANUEL GARCÍA AZNAR

23/10/2017 - 31/05/2018

- in silico and in vitro models are combined to investigate how environmental conditions drive cell behaviour, how individual cell behaviour generates multicellular patterns, how cells respond to the multicellular environment, how cells are able to generate new tissues and how cell-matrix interactions affect these processes.

Outreach & Professional Development

Reviewer in Scientific Journals

Computers in Biology and Medicine, Scientific Reports, PLOS ONE, Biomechanics and Modelling in Mechanobiology, Computer Methods and Programs in Biomedicine.

Workshops and dissemination

Aragon Mechanical Engineers Society, COGITIAR

Zaragoza, Spain

INTERVIEW

Feb. 2025

- Associate of the month (Colegiada del mes)

Heraldo de Aragón

Zaragoza, Spain

ARTICLE IN NEWSPAPER

Feb. 2023

- Cancer: models that predict how your tumour will evolve (Cáncer: modelos que predicen cómo evolucionará tu tumor)

PRIMAGE Platform functionalities & Multiscale modelling of tumour growth

Online

WORKSHOP

Jun. 2022

- Multiscale modelling of tumour growth.

Aragón Radio

Zaragoza, Spain

PODCAST IN THE REGIONAL RADIO

Jan. 2019

- Computer engineering to study paediatric tumours (Ingeniería computacional para estudiar tumores pediátricos)

Membership in Academic Institutions

European Society of Biomechanics (ESB)

Virtual Physiological Human (VPH)

German Association of Computational Mechanics (GACM)

Courses

Introduction to artificial intelligence applied to medical imaging

International workshop on bone mechanics and tissue engineering

Graphic design and creativity: posters as a tool for dissemination

Pedagogical training course for new university teachers

Academic English
